Friday September 25 at 1600 UTC (1100 CST)
sip:888@conference.freeswitch.org or via the good old PSTN at +1-213-799-1400
Or click on this link
Or call Skype the skype user "skypiax5", then press "1" on the Skype dialpad (max 20 concurrent users).

Please add agenda items as needed. If you have a question you'd like to ask then edit the **Items Needing Discussion** section below. Be sure to put your name/nick on your question.

Contents

- 1 Recap of last week
  - 1.1 Documentation
- 2 Items Needing Documentation
- 3 Janitorial Items
- 4 Items Needing Discussion
- 5 Suggestions For Future Meetings & Future To Dos

Recap of last week

The following items were discussed last week. Included are the to-do items assigned and any updates on their progress.

Documentation

Friday we discussed several topics related to documentation, both from a user level and a developer level. From the user level one big topic was "best practices" - Here's the index page we created:
Best_Practices

As far as developer documentation is concerned we are asking several community members for assistance. MikeJ made a good point: if a new dev wants to create a FreeSWITCH module then it would be good to have two layers of documentation. First, we need the introduction to creating a module. (This page is a previous attempt at doing this; probably needs a lot of attention.) Second, we need to have extensive Doxygen markup on representative modules:

- Application
- Dialplan
- XML
- Endpoint

Michael Collins has contacted the following users to ask for their help in these two areas: Andrew Thompson (Vagabond), Giovanni Maruzzelli (gmaruzz), Rupa Shomaker (rupa), Leon de Rooij (ledr), and Mathieu Rene (Math). We will update the community on each Friday's code.

- UPDATE: Moises Silva, awesome dude, independently added a codec module skeleton! Check it out: [1]

Items Needing Documentation

- Need best practices from community
    - Please submit your solutions on the Best_Practices page
- We need people with mod_fifo experience to review the mod_fifo documentation and beef it up, add to it, describe call flow scenarios, etc.

Janitorial Items

- add your items here

Items Needing Discussion

- dynamic conferencing using mod_xml_curl or JAVAScript/ODBC and mod_conference

Suggestions For Future Meetings & Future To Dos

- add your items here
