Calling Instructions

Friday October 2 at 1600 UTC (1100 CST)
sip:888@conference.freeswitch.org or via the good old PSTN at +1-213-799-1400
Or click on this link
Or call Skype the skype user "skypiax5", then press "1" on the Skype dialpad (max 20 concurrent users).

ATTENTION: As of October 9 the conference will support 48kHz CELT

Agenda

Please add agenda items as needed. If you have a question you'd like to ask then edit the **Items Needing Discussion** section below. Be sure to put your name/nick on your question.

Recap of last week

The following items were discussed last week. Included are the to-do items assigned and any updates on their progress.

Documentation

Quick review: Best Practices

Follow up with "Gang of 5" power users: Andrew Thompson (Vagabond), Giovanni Maruzzelli (gmaruzz), Rupa Shomaker (rupa), Leon de Rooij (ledr), and Mathieu Rene (Math).

Doxygen follow up: updated Doxygen. Is it working? Is it missing anything?

Items Needing Documentation

- Need best practices from community
  - Please submit your solutions on the Best Practices page
- IDEA: Default dialplan quick ref guide
  - How about someone document all the stuff you can dial in the default dp
  - Nothing fancy, just a simple list: xxxx = feature/function

Janitorial Items

- Update to trunk and test codecs: 726, LPC10, ADPCM
- We need people to assist with Q/A testing
  - Need volunteer(s) to get with bkw to create Q/A test plan that others can follow

Items Needing Discussion

- UPDATE: How have your tests of Mike van Lammerman's Ultramonkey setup (http://bit.ly/8zZUS) been doing?
- Suggestion: community contributions to freeswitch.org
  - Are there volunteers who would like to blog, write stories, add content to the main FS page?
- Need help dispelling myth: FreeSWITCH offer "basic PBX functionality"
  - I would love some brief descriptions of what you guys are doing with FreeSWITCH so I can write an article to educate the uninformed who keep saying that "FreeSWITCH is just an Asterisk alternative that offers basic PBX functionality."

Suggestions For Future Meetings & Future To Dos

- Add your items here.
