Agenda

Please add agenda items as needed. If you have a question you'd like to ask then edit the **Items Needing Discussion** section below. Be sure to put your name/nick on your question.

Recap of last week

- Update on MW goog search
- Update on mythbusters article
- Group discussed making screen casts for training purposes
  - David Horner (IRC: djacobs) trying some webcasts with mod_managed
  - Other web-cast wish-list items: CentOS 5.4 quick install, dialplan parsing

Items Needing Documentation

- Group review: channel states docs Channel_States
  - Thanks to community for assisting

Janitorial Items

- Briefly review the below janitorial items
- Need volunteers to help with cleaning up dead end wiki pages
  - http://wiki.freeswitch.org/index.php?title=Special:DeadendPages&limit=500&offset=0
  - All dead-end pages need links to somewhere appropriate

    - Please add links as you see fit
- Need volunteers to help with cleanup up double redirects
    - http://wiki.freeswitch.org/wiki/Special:DoubleRedirects
- Need volunteers to help with cleanup of orphaned pages
    - http://wiki.freeswitch.org/wiki/Special:LonelyPages
    - orphaned pages are pages that are not linked to by other pages, so the only way to get to them is by searching or knowing the URL
- Need volunteers to review "wanted" pages and categories - pages that are linked-to but have zero content
    - http://wiki.freeswitch.org/wiki/Special:WantedPages
    - http://wiki.freeswitch.org/wiki/Special:WantedCategories
- Need volunteers to review uncategorized pages and update them where appropriate
    - http://wiki.freeswitch.org/wiki/Special:UncategorizedPages
    - If you need to create a new category please see MSC first so that we don't make too many of them

Items Needing Discussion

- Group question: has anyone review bkw's test scripts? Anyone in a position to create a test server(s)?
    - Moc and djacobs mentioned unit testing. djacobs also mentioned "plaster" but I didn't find anything on goog.
- Question: what license for wiki content? CC-PD? CC-BY? CC-BY-SA? CC-BY-NC? CC-BY-NC-SA?
    - MSC prefers CC-BY
- With the recent Vishing nonsense w/ Asterisk let's talk about security
    - What are your security best practices?
    - How do you protect VoIP specifically?
    - How do you protect VM systems (i.e. brute-force PIN-entering attacks, etc.)?
    - Can we start getting this on the wiki?
- New FS stuff
    - 1.0.5pre4
    - uuid_debug_audio <uuid> <read|write|both> <on|off>
    - sql-in-transactions profile param (only vaid on first load)
    - ignore_display_updates variable to block display updates on that leg
    - campon_stop_key and campon_announce_sound to tell the user how to force it to the end of the waiting period
    - add pass-callee-id profile param (defaults to true) disable by setting it to false if you encounter something too stupid to ignore X headers
    - add RECORD_READ_ONLY and RECORD_WRITE_ONLY chan vars to influence session_record
    - add record_min_sec chan var
