Calling Instructions

Friday January 22 at 1700 UTC (1100 CST)
sip:888@conference.freeswitch.org or via the good old PSTN at +1-919-386-9900
Or click on this link
Or call Skype the skype user "skypiax5", then press "1" on the Skype dialpad (max 20 concurrent users).
Codecs: PCMU/PCMA, G.722, CELT, Speex, Skype, among others

Agenda

Please add agenda items as needed. If you have a question you'd like to ask then edit the **Items Needing Discussion** section below. Be sure to put your name/nick on your question.

Recap of last week

- Our guilt trip of saying not many people volunteered yielded modest results - we got a few more folks to help. :)
- DRK did some simple web-casting stuff w/ Silverlight
- We found another possibility: vncreflector for webcasting
- Updates from the community:
  - Sekil has web dev
  - jlenk and the API docs
  - Others...?

News, Notes, & Miscellaneous Fun Stuff

- New FS stuff
- Sangoma is supporting the conf calls and the "10th Annual ClueCon" event. :P
- Mini "almost ready" announcement and little talk about mod_gsmopen, GSM (cellular) endpoint and trunk

Items Needing Documentation

- From bkw - need C# ESL examples, docs, info - whatever you got we'll take it!
    - I've heard that some have had trouble compiling esl/managedmod. Any feedback? I can compile fine on CentOS 5.3 using latest trunk. (MC)
- Could someone add a timer_test API to wiki please?

Janitorial Items

- Add any items here if you have them.

Items Needing Discussion

- DRK updates on his screen-casting tests
- Need someone with some skills to assist with configuring and testing vncreflector - need Linux and networking skills
- Darren Schreiber of FreePBX is slated to join the conference and give us an update on FreePBX V3 and to answer your questions.
- How to handled customizations without messing up the default configs
    - We need input on how we can make it easy for people to add their config customizations without forcing them to modify the default config files (if possible)
    - Thoughts? e.g. should we have a separate custom sub-dir and add a bunch of includes? I'm open to ideas

Suggestions For Future Meetings & Future To Dos
