Bad Docs - Fix or Remove

Add a list of all bad docs here please.

Start here Special:Shortpages

Meeting agenda goes out mondays.

Getting started Guide and install guide need clarification.

Seems getting started and install guide are a bit confusing. Need to consolidate or clarify the documentation.

I've rearranged the Getting started guide a bit. //verifier

Orphaned Wiki Pages

Here is a list of pages that aren't linked Special:Lonelypages

Improve wiki Search

Verify apps, apis and variables are all documented.

Verify the syntax descriptions match the cli, Make sure all the session variables are documented.

Lua/Perl/js ivr 5000 examples (mcollins)

Sound files needed

Voicemail - verify sounds and functionality.

Verify prompts are correct and everything works correctly.

~take-a-number on #freeswitch IRC Channel

ChanServ - on join announcement

This has been added to ChanServ for #freeswitch on entry message.

Welcome to #freeswitch. If you need assistance please type ~take-a-number [insert your question here] or read http://wiki.freeswitch.org or check out our issue tracker at http://jira.freeswitch.org, binaries and tarballs can be downloaded from http://files.freeswitch.org, Please sit back and relax.

FreeSWITCH dev guild?

Default config tweaks needed

Document luarun, jsrun, perlrun

Have improved jsrun documentation, hope it's better.

Pending issues/bugs
