

You can participate every Wednesday at 1800 UTC (1300 CST) by calling sip:888@conference.freeswitch.org or via the nasty old PSTN at 213-799-1400 Or clicking on [\[1\]](#)

Contents

- [1 API documentation](#)
- [2 Misc Items](#)
- [3 If we have time](#)
- [4 User documentation](#)

API documentation

- We have a report that `uuid_send_dtmf` isn't documented. We need volunteers to compare the output of "show api" with what is [here](#) and get the wiki sync'd up with what's actually in FS.
 - ◆ This API call will queue DTMF digits on the session specified by uuid.

Misc Items

- sip_bye_h prefix to add headers to bye
 - ◆ You can add custom headers to the bye message similar to sip_h_X
- document telecast interface - this is so cool and I don't think anyone knows about it!! I will try to get a stub started shortly
 - ◆ Also, how difficult would it be to modify the base HTML for the telecast page to pull in a template file instead of having the HTML hard-coded in `mod_shout.c`? I would like to explore the idea of extending the telecast page, adding some javascript and a `<noscript>` section. The js could do periodic refreshes of the telecast list, have a check box to turn auto-refresh on or off, etc.

If we have time

- Media bugs - I see media bugs all over the place but I don't see much, if any documentation. I'd like to get at least some basic developer info into the wiki:
 - ◆ What are media bugs? (In a nutshell)
 - ◆ What can they do?
 - ◆ What are they doing now? (e.g. in `tone_detect`, `telecast`, etc.) Let's get a list going of some of the great features that utilize media bugs
 - ◆ Where in the source are the guts of media bugs?

User documentation

- There are a lot of getting started questions (from myself included) that have answers in the WIKI but the answers are buried. Ironically, the answers are all there, but not always well organized. I don't know if there is an initiative to improve the WIKI documentation structure, but it's certainly being used a lot. I wonder if I could spearhead something if nobody else is doing this? - Darren
